WORK EXPERIENCE

Sunbi Design Studio

UI Designer

My responsibilities included wireframing, prototyping and coding full fledged websites. I worked closely with a team of designers and developers on a few in house web applications and built a few components but mostly I worked on individual projects by pairing up with a developer.

July 2014 - July 2015 │ Nepal

Third Pole Connects

UI Developer

My responsibilities included working with a team of designers and developers and designing and coding the web interfaces for an in house project. I led the design team and I worked closely with the developer team and delegated tasks to designers on my team according to their level of skill.

I also worked on a few independent projects for other clients and it was mainly designing single pager websites and designing visuals for a Facebook marketing campaign for one of our clients.

I was also responsible for designing visuals in order to boost the companies online presence over various social media platforms.

August 2013 - May 2014 │ Nepal

OMG Theme Events

Graphic Designer

My responsibilities included forming and designing layouts, print design and visual design including but not limited to logo design, pamphlets, brochures, business cards, lanyards etc.
